

**Billion Dollar Brown** – lately we have been hearing that this has been healing a little too warm. We have replaced this with a cooler, soft brown . It is slightly darker and is good to use on darker blonde and brown hair colour

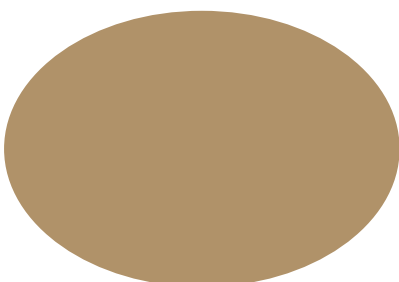

**Brown Bonanza** – Changed to a softer brown with less warmth which heals a similar colour to Hazel pencil by Rimmel. Good to use on blonde, light brown, auburn hairtones.

**Earthy Amber** – relaunched as a soft correcting colour. Use on brows that have healed or faded to a warm tone- this colour is softer than King of Khaki. Can be used to create an ashy brow colour by mixing with other pigments.

**Onyx** – One of the darkest colours in our range. We have taken away all the warmth. Great for male procedures, darker skin tones and people who require very dark brows.

**Sunstone** – Previously too warm. This new colour is perfect for a good, light, cool base. Mix with other browns to create darker shades. Used from the bottle it is good for very fair blondes
