Remove and  
Improve  
(non laser  
tattoo removal)

# 1 day Tattoo Removal

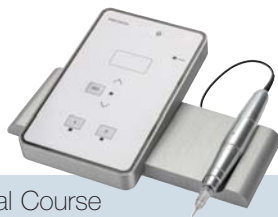

## Overview

Rejuvi Eaze solution is a liquid alternative to laser for slowly removing unwanted tattoos. This one day course will teach you how to remove and/or lighten pigment from the skin for semi permanent makeup and body tattoos in a similar manner as the original tattoo.

The treatment is safe and offers clients an alternative to other removal processes with the added benefit of being able to remove all colours – although, as with the laser, it is not possible to guarantee complete removal.

Procedures are less painful than laser removal, and treatments can be scheduled every 8-12 weeks.

Completion of this course will give you the skills to increase your revenue and sales and means you will be able to offer treatment to both male and female clients of all ages.

1 day Tattoo Removal Course	£995
Precision Plus Nano machine	£1,800
<b>Total</b>	<b>£2,795</b>
Plus VAT	£559
<hr/>	
Total cost including VAT	£3,354

## Who is suitable for this course?

This course is open to anyone and our trainer will come to you for the day. It is suitable for new-starters as well as semi permanent make up professionals.

You will be trained working on your own clients – model requirements can be discussed at the point of booking a date to suit your diary.

If you are new to micropigmentation, you will be required to complete an induction module – cost £600+VAT. Please ask for further details.

## Running order

This is a one day module. It will be a blend of theory and practical application.

## Class size

All courses are based on a ratio of one trainer per two trainees.

**Get 10% discount on all products purchased whilst on your course.**

# (non laser) £995<sub>+VAT</sub>

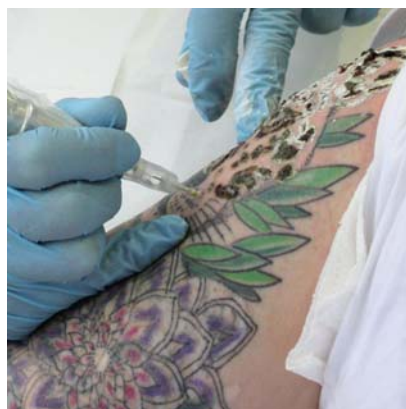

## Key learning points

Induction and theory is usually home study.

- Managing client expectations and needs: understanding how to communicate what can and can't be achieved
- Anatomy and physiology: how the skin heals and repairs
- Consultations and contra indications: what not to treat
- Skin disorders and lesions
- Scarring, side effects, complications
- The tattooing process and how it reacts in the skin
- Removal techniques available – laser removal versus skin trauma
- Pigment extraction and healing
- The science behind the Rejuvi removal product
- Large area techniques
- The healing process
- Avoiding scarring

## Practical session

- Minimum of 2 hours hands-on

Cost to technician per procedure

£20

Suggested retail cost per procedure

£150
