# Tattoo Removal Course

1 day non laser course £1,250+VAT (£1,500)

## Overview

This one day course will teach you how to remove and/or lighten pigment from the skin for semi permanent makeup and body tattoos in a similar manner as the original tattoo.

The treatment is safe and offers clients an alternative to other removal processes with the added benefit of being able to remove all colours – although, as with the laser, it is not possible to guarantee complete removal.

Procedures are less painful than laser removal, and treatments can be scheduled every 8-12 weeks.

Completion of this course will give you the skills to increase your revenue and sales and means you will be able to offer treatment to both male and female clients of all ages.

Module 1	Home study with online learning	1 day
Module 2	Hands-on practical	1 day

## Who is suitable for this course?

This course is open to anyone and our trainer can come to you for the day. It is suitable for new-starters as well as semi permanent make up professionals.

## Running order

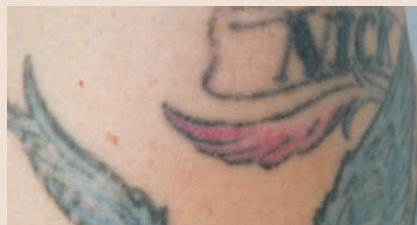

This is a 2 day course. 12-16 hours online learning and 1 day in clinic for hands-on training

## Class size

All courses are based on a ratio of one trainer per two trainees.

## Hands-on experience

You will be trained working on your own clients – model requirements can be discussed at the point of booking a date to suit your diary.
